

WATER TREATMENT & RESTORATION SOLUTIONS

Water and wastewater treatment plants provide critical services to municipalities and require expert maintenance and repair.

LRT 
RESTORATION TECHNOLOGIES

EXPERTS IN RESTORATION, REPAIR, AND WATERPROOFING

Proper treatment of sewage, agriculture, and industrial wastewater is key to the water environment.

Plants may consist of concrete basins, motors and pumps, circulating devices, waste separation, etc., and all of these structures must withstand temperature changes, pressure, and maintain all-day operations.

Safeguard your operations against damage.

Damage comes in many forms including freeze/thaw cycle, concrete deterioration, wet/dry cycle, and breakdown of specialty construction materials. Restore the durability of water and wastewater treatment plants with industrial restoration and concrete repair.

Count on a team that will deliver on schedule.

From new construction to existing structures, LRT has the resources and capabilities to complete projects of all sizes and complexities.

Repairs and Services

- Crack Repair and Caulking
- Epoxy and Urethane Injection
- Waterproofing
- Concrete Repairs and Restoration
- Cathodic Protection
- Chemical Grouts
- Industrial Coatings
- Underwater Repair
- Vertical and Overhead Repair

Let's discuss your project — LRT's experts can help you find the right solution to secure your structure against water damage.
